FIRST RESPONSE is the leading provider of mobile GPS Emergency Medical Alert Systems and home-based personal emergency response systems for active, independent seniors nationwide.

Product Description

"VRI MobileCare with GPS Medical Alert is a discrete and reliable support system that goes everywhere, all the time". Advocates for the Independent (2014)

The freedom to go anywhere with confidence...

MobileCare brings safety to everyday senior living. Designed to break through the confines of traditional home-bound emergency medical monitoring, MobileCare is a complete service that includes a discrete, wearable device to provide highly sophisticated fall detection capabilities for Personal Emergency Response Services (PERS), GPS-tracking & locating, and two-way automated hands-free communication from virtually anywhere via cellular (tower) networks. The device, worn as a bracelet or necklace, connects directly to our First Response national emergency monitoring center for instant live operator assistance whenever and wherever needed.

Use as a personal emergency medical alert system that is portable and completely mobile...

- GPS location technology allows user to remain safe even outside the home, anywhere
- Nationwide signal coverage; GPS tracker locates user to within 100 feet of user position
- Touch button technology on device transmits emergency panic alarm automatically
- 2-way voice activated speaker provides clear, reliable 2-way live communication
- Patented Fall Detection Technology w/multi-sensor application detects falls and sends alert
- Water resistant device (worn as a bracelet, belt clip or necklace) can be worn in the shower
- 36-hour standby battery with 30-minute active call reserve; charger docking station
- Small, lightweight device with durable casing for easy access, function and appeal
